API

App Engine Admin API

Provisions and manages developers' App Engine applications.

Type: API

Producer: Google Enterprise API

App Engine Admin API | Google Cloud Documentation

Gets information about an application. RepairApplication, Recreates the required App Engine features for the specified App Engine application, ...

Type: Documentation

REST Resource: apps.services.versions | App Engine ...

Admin API will use the App Engine Appspot service account as default if this field is neither provided in app.yaml file nor through CLI flag.

Type: Documentation

App Engine Admin API | Google Cloud Documentation

A service endpoint is a base URL that specifies the network address of an API service. One service might have multiple service endpoints.

Speed up your search with these quick tips

Press / to search from anywhere in the console

Find 111 resource types and more by using the new filters on this page

Find an API key by entering its key string in search

Search for top AWS or Azure offerings and get suggestions for similar Google Cloud products. [Learn more](#)
