EC2

Instances

Launch an instance

You can use a key pair to securely connect to your instance. Ensure you have a key pair ready before launching your instance.

Key pair name - required

Select

For Windows instances, you use a key pair to decrypt the administrator password.

Network settings

Info

Network

vpc-01c6e7c7426e15240

Subnet

Firewall (security groups)

Info

Create security group

Select existing security group

We'll create a new security group called 'launch-wizard-3' with the following rules:

Allow RDP traffic from

Anywhere

0.0.0.0/0

Create key pair

Key pair name

Key pairs allow you to connect to your instance securely.

Awantika's key

The name can include up to 255 ASCII characters. It can't include leading or trailing spaces.

Key pair type

RSA

RSA encrypted private and public key pair

ED25519

ED25519 encrypted private and public key pair (Not supported for Windows instances)

Private key file format

.pem

For use with OpenSSH

.ppk

For use with PuTTY

When prompted, store the private key in a secure and accessible location on your computer. You will need it later to connect to your instance. [Learn more](#)

Record RDP connections
You can now record RDP connections using AWS Systems Manager just-in-time node access. [Learn more](#)

Try for free

Instance ID
i-028037a39f6c0f8af (Awantika's Server)

Connection Type

Connect using RDP client
Download a file to use with your RDP client and retrieve your password.

Connect using Fleet Manager
To connect to the instance using Fleet Manager Remote Desktop, the SSM Agent must be installed and running on the instance. For more information, see [Working with SSM Agent](#)

You can connect to your Windows instance using a remote desktop client of your choice, and by downloading and running the RDP shortcut file below.

Download remote desktop file

When prompted, connect to your instance using the following username and password:

Public DNS
ec2-65-0-72-55.ap-south-1.compute.amazonaws.com

Username Info
Administrator

Password [Get password](#)

If you've joined your instance to a directory, you can use your directory credentials to connect to your instance.

Activate Windows
Go to Settings to activate Windows.

DESTINATION SERVER
EC2AMAZ-Q7Q47ND

This wizard helps you install roles, role services, or features. You determine which roles, role services, or features to install based on the computing needs of your organization, such as sharing documents, or hosting a website.

To remove roles, role services, or features:
Start the Remove Roles and Features Wizard

Before you continue, verify that the following tasks have been completed:

- The Administrator account has a strong password
- Network settings, such as static IP addresses, are configured
- The most current security updates from Windows Update are installed

If you must verify that any of the preceding prerequisites have been completed, close the wizard, complete the steps, and then run the wizard again.

To continue, click Next.
